

ATPL(H) - Issuance

Application for the issue of an Airline Transport Pilot Licence ATPL(H) according to Commission Regulation (EU) No 1178/2011 Annex I (Part-FCL) Subpart F

Please fill in the framed fields of the form, sign it and send it together with attachments to:

AUSTRO CONTROL GmbH, Aviation Agency, Management Services, Wagramer Straße 19, 1220 Vienna, Austria

1 Type of application

I apply for the issue of an Airline Transport Pilot Licence ATPL(H) according to Commission Regulation (EU) No 1178/2011 Annex I (Part-FCL) Subpart F after having successfully completed a skill test in accordance with FCL.520.H.

Note for the applicant: To apply for an ATPL theory credit, please use form FO_LFA_PEL_215.

9 Guidelines for the conduct of the skill test

PASS MARKS

1. In case of skill test or proficiency check for type ratings and the ATPL the applicant shall pass sections 1 to 4 and 6 (as applicable) of the skill test or proficiency check. Failure in more than five items will require the applicant to take the entire test or check again. An applicant failing not more than five items shall take the failed items again. Failure in any item of the re-test or re-check or failure in any other items already passed will require the applicant to take the entire test or check again. All sections of the skill test or proficiency check shall be completed within 6 months.
2. In case of proficiency check for an IR the applicant shall pass section 5 of the proficiency check. Failure in more than three items will require the applicant to take the entire section 5 again. An applicant failing not more than three items shall take the failed items again. Failure in any item of the re-check or failure in any other items of section 5 already passed will require the applicant to take the entire check again.

FLIGHT TEST TOLERANCE

3. The applicant shall demonstrate the ability to:
 - a) operate the helicopter within its limitations;
 - b) complete all manoeuvres with smoothness and accuracy;
 - c) exercise good judgement and airmanship;
 - d) apply aeronautical knowledge;
 - e) maintain control of the helicopter at all times in such a manner that the successful outcome of a procedure or manoeuvre is never in doubt;
 - f) understand and apply crew coordination and incapacitation procedures, if applicable; and
 - g) communicate effectively with the other crew members, if applicable.
4. The following limits shall apply, corrected to make allowance for turbulent conditions and the handling qualities and performance of the helicopter used:
 - a) IFR flight limits

| Height | | Tracking | |
|--|------------------------|--|---|
| Generally | ± 100 feet | On radio aids | ± 5° |
| Starting a go-around at decision height/altitude | + 50 feet / - 0 feet | For „angular“ deviations | Half scale deflection, azimuth and glide path (e.g. LPV, ILS, MLS, GLS) |
| Minimum descent height/MAP/altitude | + 50 feet / - 0 feet | 2D (LNAV) and 3D (LNAV/VNAV) “linear” lateral deviations | cross-track error/deviations shall normally be limited to ± ½ the RNP value associated with the procedure. Brief deviations from this standard up to a maximum of 1 time the RNP value are allowable. |
| - | - | 3D linear vertical deviations (e.g. RNP APCH (LNAV/VNAV) using BaroVNAV) | not more than - 75 feet below the vertical profile at any time, and not more than + 75 feet above the vertical profile at or below 1000 feet above aerodrome level. |
| Speed | | Heading | |
| All engines operating | ± 5 knots | All engines operating | ± 5° |
| With simulated engine failure | + 10 knots / - 5 knots | With simulated engine failure | ± 10° |

b) VFR flight limits

| Height | | Ground drift | |
|-------------------------------|------------------------|---------------------------------|---|
| Generally | ± 100 feet | T.O. hover I.G.E | ± 3 feet |
| - | - | Landing | ± 2 feet (with 0 feet rearward or lateral flight) |
| Speed | | Heading | |
| Generally | ± 10 knots | Normal operations | ± 5° |
| With simulated engine failure | + 10 knots / - 5 knots | Abnormal operations/emergencies | ± 10° |

CONTENT OF THE TRAINING/SKILL TEST/PROFICIENCY CHECK

5. The following symbols mean:

P Trained as PIC for the issue of a type rating for SPH or trained as PIC or Co-pilot and as PF and PNF for the issue of a type rating for MPH.

6. The practical training shall be conducted at least at the training equipment level shown as (P), or may be conducted up to any higher equipment level shown by the arrow (→).

The following abbreviations are used to indicate the training equipment used:

FFS Full Flight Simulator
FTD Flight Training Device
H Helicopter

7. The starred items (*) shall be flown in actual or simulated IMC, only by applicants wishing to renew or revalidate an IR(H), or extend the privileges of that rating to another type.

8. Instrument flight procedures (section 5) shall be performed only by applicants wishing to renew or revalidate an IR(H) or extend the privileges of that rating to another type. An FFS or FTD 2/3 may be used for this purpose.

9. Where the letter 'M' appears in the skill test or proficiency check column this will indicate the mandatory exercise.

10. An FSTD shall be used for practical training and testing if the FSTD forms part of a type rating course. The following considerations will apply to the course:

- i) the qualification of the FSTD as set out in the relevant requirements of Part-ARA and Part-ORA;
- ii) the qualification of the instructor and examiner;
- iii) the amount of FSTD training provided on the course;
- iv) the qualifications and previous experience in similar types of the pilot under training; and
- v) the amount of supervised flying experience provided after the issue of the new type rating.

MULTI-PILOT HELICOPTERS

11. Applicants for the skill test for the issue of the multi-pilot helicopter type rating and ATPL(H) shall take only sections 1 to 4 and, if applicable, section 6.

12. Applicants for the revalidation or renewal of the multi-pilot helicopter type rating proficiency check shall take only sections 1 to 4 and, if applicable, section 6.
